In the matter of: Nomination for Universal Service Administrative Company Board of Directors,

FCC Docket Nos. 97-21 and 96-45.

Dear Mr. Powell:

The Nebraska Educational Service Unit Administrator Association would like to nominate Dr. Douglas D. Christensen, Nebraska Commissioner of Education, to serve a term on the Universal Service Administrative Company Board of Directors representing schools that are eligible to receive support from the Universal Service program.

Dr. Christensen was appointed Commissioner by the Nebraska State Board of Education in 1994. During his term of office, he has continually supported all students in the public and private schools of Nebraska. He also continues to be a vocal advocate for the Bureau of Indian Affairs and its goals and objectives designed to promote student learning

For the last nine years, he has guided the state's school systems through their technology planning and infrastructure development. Under his leadership and through the work of the Educational Technology Consortium, the state department of education has:

- Assisted schools and Educational Service Units (ESUs) in applying for and receiving \$18 million dollars in line cost savings from local carriers through the Universal Services Fund, E-Rate.
- Completed construction of distance learning facilities in the Technology Center that provide two way interactive video/audio communication among 100 sites in eastern Nebraska. The system will have potential to connect with at least 230 other two way sites located statewide. It will be used for consultation, conferencing, and staff development among NDE staff and schools and ESUs.
- Completed certification and re-certification of 440 school district technology plans. Plans now reside in an electronic database that easily and rapidly provides access to

technology trends, equipment, goals and objectives of schools reporting and provides summary reporting and projections.

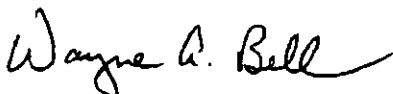

- Completed construction of a link to the Nebraska Video Conferencing Network that provides two-way interactive video/audio communications to 27 state government locations statewide. Intended use is to provide a vehicle for consultation, conferencing and staff development.
- Conducted an annual statewide K-12 distance learning survey and summarized and published the results. The survey dealt with current utilization of the distance-learning infrastructure.
- Actively worked with Nebraska Information Technology Commission Education Council and ESUs to establish a statewide backbone in place and in expanding the bandwidth of the existing infrastructure.
- Worked with cable companies, TeleCos, Nebraska Educational Telecommunications and ESUs to provide gateways for better inter-pod communications
- Researched and developed prototype streaming video system for the electronic dissemination of resources and presentations.

As Nebraska looks to the future of education technology, the state will be guided by the recently-completed State School Improvement/Technology Plan. In developing the plan, Dr. Christensen worked with representatives from Local Educational Agencies (LEAs) (teachers and administrators), Educational Service Units, higher education, state school board association, state teachers association, state council of school administrators, and representatives of the private sector. The state is working to establish and implement a technology based data and information system that correlates with, facilitates and enhances Nebraska School Improvement and increased student performance. The state also seeks to facilitate and enhance teaching and student learning with the use of technology and align it with the Nebraska School Improvement Plan. Finally, Dr. Christensen has tasked the state with monitoring student proficiency to provide evidence that shows increases in student achievement and school improvement through the use of technology.

In addition to his role as Superintendent of Schools in Nebraska, Dr. Christensen currently serves on the Board of Directors for the Council of Chief State School Officers. In his capacity as a board member for the Council, he represents 49 of the state education leaders, the District of Columbia, the Department of Defense Education Activity, and five U.S. extra-state jurisdictions.

We believe that the USAC Board of Directors will be well served by Dr. Christensen's breadth of knowledge and experience in the fields of education and educational technology. We urge the commission to appoint Dr. Christensen to the USAC Board.

Sincerely,

Dr. Wayne A. Bell, President  
Nebraska Educational Service Unit Administrator Association
